- HTML5
- CSS/CSS3
- React.js
- Node.js
- embedded JS
- Express
- MongoDB
- Mongoose
- Python
- Peewee
- Flask
- SQL

EDUCATION

Software Engineering, Certificate

General Assembly
Los Angeles | 2019

Bachelor of Arts, Sociology

San Francisco State
University | 2005 - 2009

PROJECTS

LA Food Policy Council Food System Dashboard

- A full stack web app developed during Social Impact Hackathon to develop a food system dashboard for client LAFPC.
- This project uses React and Google's firebase realtime database; tailored to the client by integrating google sheets for easy modification of their data without any tech background.

Memeodex

- A full stack web app that allows users to store links to their favorite online memes for quick reference and later review.
- This project uses the MEN stack (mongoose, express, node) with embedded javascript.

Pantry Pal

- A full stack web app that allows users to keep track of their food inventory by quantity and expiration date.
- This project uses the MERN stack (mongoose, express, react, node) with reusable react components and a RESTful API architecture.

Frogger

- I recreated the classic arcade game Frogger, where a player moves their frog across the road and river to the safety of the lily pads.
- This project uses flexbox CSS for style and vanilla JS for DOM manipulation with responsive movement and collision detection.

EXPERIENCE

Legal Secretary

Buchalter, A Professional Corporation
April 2016 – July 2019

Paralegal

Robbins Geller Rudman & Dowd, LLP
Nov 2010 – July 2015
